

## Providing Quality Service for years

Associated Services for the Blind, with a proud history that dates back to 1874, promotes independence, self-determination and opportunity for people who are blind and visually impaired.

ASB recognizes that technology is often the key to success and opportunity, and that vision loss is a challenge, not a barrier. Our response to that challenge is the Computer Technology Center.

Students acquire the skills and the confidence they need to compete and to achieve. Find out for yourself. Discover a world of possibilities in ASB's Computer Technology Center.

The ADA requires that printed materials be available in alternative formats for individuals who are blind and visually impaired.

If you would like more information on the Computer Technology Center please call Associated Services for the Blind & Visually Impaired at (215) 627-0600 extension 3265.

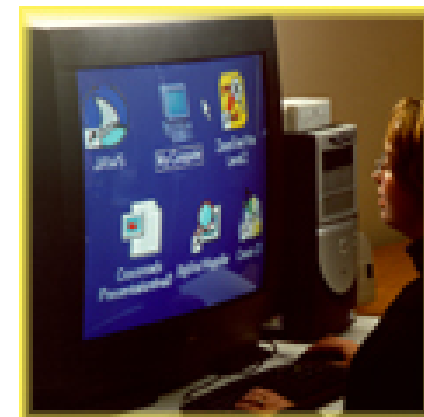

ASB is always pleased to offer tours of its Computer Technology Center. Please call ahead to schedule a tour.

## PROVIDING OPPORTUNITY

ASB's Computer Technology Center (CTC) offers basic to advanced computer training for blind and visually impaired adults.

The Computer Technology Center's comprehensive and individually tailored curriculum prepares students for personal and professional success.

Courses may be taken individually or as a complete package. In either case, the outcome is a future bright with new opportunities.

We will work with you to ensure that you receive the proper computer training that you need for your lifestyle.

## SERVING THE TRI-STATE AREA

We offer a full range of courses, from basic computer skills to the latest access technology, including the Internet and adaptive equipment.

Our computers are equipped with speech (JAWS or Window-Eyes) and screen enlargement (ZoomText) software, giving users quick access to vital information, at home and on the job.

Our graduates are ready to compete in the workplace and to explore the world.

*Join us and get started with  
your future in computing!*

## ABOUT ASB

As a Computer Technology Center student, you'll select from six structured courses or request customized training. And, of course, we'll make sure our teaching matches your computer skills and objectives.

Here is a sample of the broad curriculum:

- Windows Operating System
- Menus and Toolbars
- Reading, Writing, & Scanning
- Windows Explorer
- Spreadsheets & Databases
- Word Processing
- Going Online - the Internet
